

ZEILFELDER
PUMPEN

HIGH PERFORMANCE PUMPS

**Rotary Lobe/
Gear Pumps**

Up to:

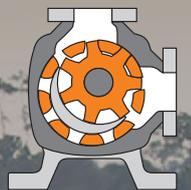

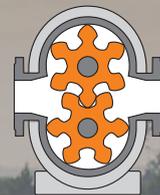

120 bar

450°C

$\eta=$ **92%**

3,400,000 mPas

API, TA-Luft,
ATEX and TR CU
certifications

made in Germany

OUR ADVANTAGES

Zeifelder's diverse high performance pumps are able to serve all your needs and respond to any challenge.

DESIGNED FOR*

- Complex and difficult challenges
- Pressures up to 120 bar
- Suction lifts up to 8 m
- Flow rates from 1.5 l/h to 300 m³/h
- Viscosities up to 3,400,000 mPas
- Temperatures from -60°C to 450°C
- Dosing (repeat accuracy > 99%)
- Explosive und toxic substances
- Liquids containing solids (up to 90%)
- Liquids containing shear sensitive materials (for example fruits)
- Polymerizing or coagulating liquids

ADVANTAGES*

- API, ATEX, TA-Luft and TR CU compliant
- High durability through high-end bearings and special coatings
- Low energy consumption and high efficiency up to $\eta = 92\%$ through tight manufacturing tolerances
- Dry running capability
- Nearly pulsation free pumping at varying viscosities
- Low rotational speed and gentle pumping because of high displacement/revolution
- Completely reversible flow
- Vertical flow
- Low noise level
- No valves required

OPTIONS

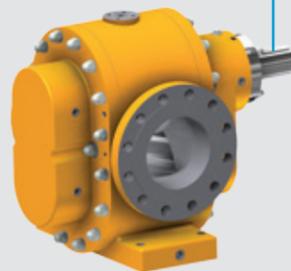

- All sealing options: lip seal/packing, single and double mechanical seals and magnetic couplings
- Explosion proof
- Heating jacket (steam, oil or electric)
- Heated sealing area
- Fully ceramic pump
- Special materials for extreme applications

*Depending on the pump type and series

UP TO 120 BAR

1.2 KM WATER COLUMN

GEAR PUMPS

PRESSURE
UP TO 120 bar

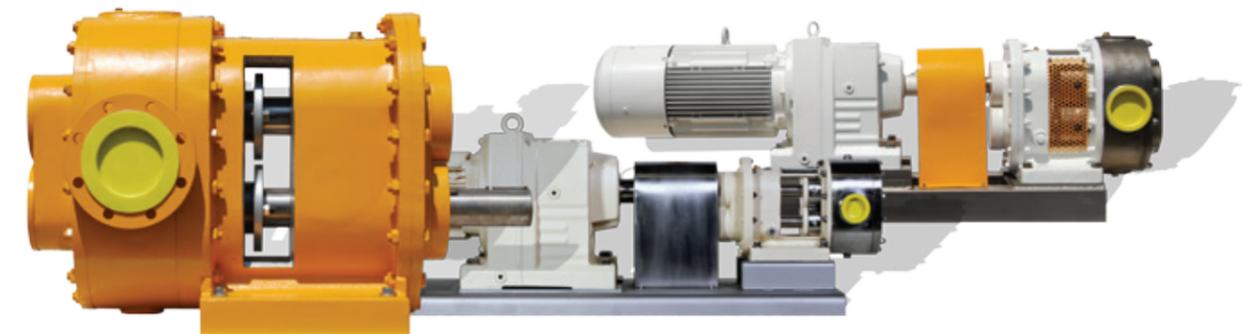

SUCTION LIFT
UP TO 6 m

VISCOSITY
UP TO 150,000 mPas

TEMPERATURE
-60 TO 450°C

FLOW RATES
UP TO 5000 l/min
(300 m³/h)

ROTARY LOBE PUMPS

PRESSURE
UP TO 64 bar

SUCTION LIFT
UP TO 8 m

VISCOSITY
UP TO 3,400,000 mPas

TEMPERATURE
-60 TO 450°C

FLOW RATES
UP TO 5,000 l/min
(300 m³/h)

POSITIVE DISPLACEMENT PUMPS

Zeifelder pumps work by using two rotating elements, unmeshing at the suction side of the pump, to create a vacuum that fills the spaces created between the elements and the suction casing. These spaces then transport the fluid along the outer casing to the discharge side where the gears re-mesh and discharge the fluid.

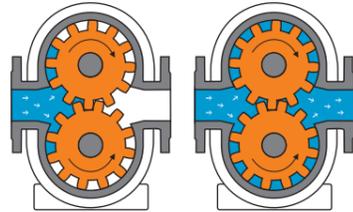

Positive displacement pumps are designed to handle large changes in pressure, viscosity and flow rate and are often used for highly viscous liquids with large percentages of solids.

EXTERNAL GEAR PUMPS

are self-priming, non-pulsating and reversible pumps that work best on clean, lubricating fluids with a viscosity thicker than water. Two gear teeth, one idler and one driver, mesh together to transfer the liquid.

Because of the balanced construction and bearings on both sides of the shafts, the pumps are capable of non-pulsating flow and high pressures.

SERIES
ZK BLUE
ZH/ZV BLUE
PQ GREEN

OVERVIEW

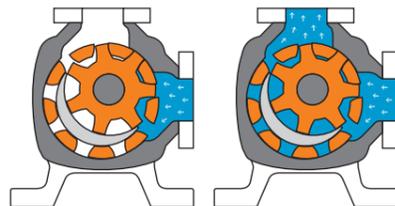

- For standard to high end applications
- ZK and ZH/ZV Blue available in all materials
- PQ Green available in cast iron and stainless steel

INNER GEAR PUMPS

are self-priming, non-pulsating and reversible pumps that work best on clean, lubricating fluids with a viscosity thicker than water. Two gear teeth, one idler and one driver, mesh together around a crescent divider to transfer the liquid.

Because of the simple one shaft construction, inner gear pumps are less expensive than comparable pumps and are very easy to maintain.

SERIES
ZI GREEN

OVERVIEW

- For standard applications
- Available in cast iron and stainless steel

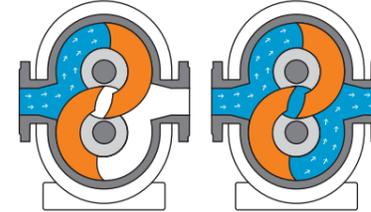

“CUSTOM SOLUTIONS FOR EXTREME APPLICATIONS”

ROTARY LOBE PUMPS

are self-priming, dry-run capable and reversible pumps designed for highly viscous liquids containing solid particles. Two non-contacting rotary lobes work together to transfer the liquid, while the shafts are driven by timing gears outside the process liquid.

Because of the very large internal cavities, rotary lobe pumps are able to handle extremely viscous liquids and large abrasive particles.

SERIES
KE/KD BLUE
KS/KDS BLUE

OVERVIEW

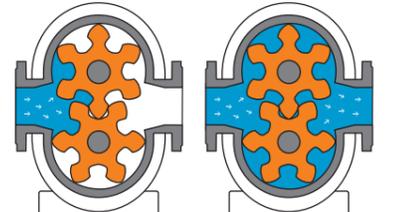

- For high end applications
- Available in all materials

MULTI-WING PUMPS

are a combination of gear and rotary lobe pumps designed for highly viscous liquids containing small solid particles. Two non-contacting lobes, consisting of multiple wings, work together to transfer the liquid, while the shafts are driven by timing gears outside the process liquid.

Because of the large number of lobes, multi-wing pumps are self-priming, dry-run capable and reversible pumps capable of handling extremely viscous liquids and small abrasive particles.

SERIES
KM BLUE

OVERVIEW

- For standard to high end applications
- Available in all materials

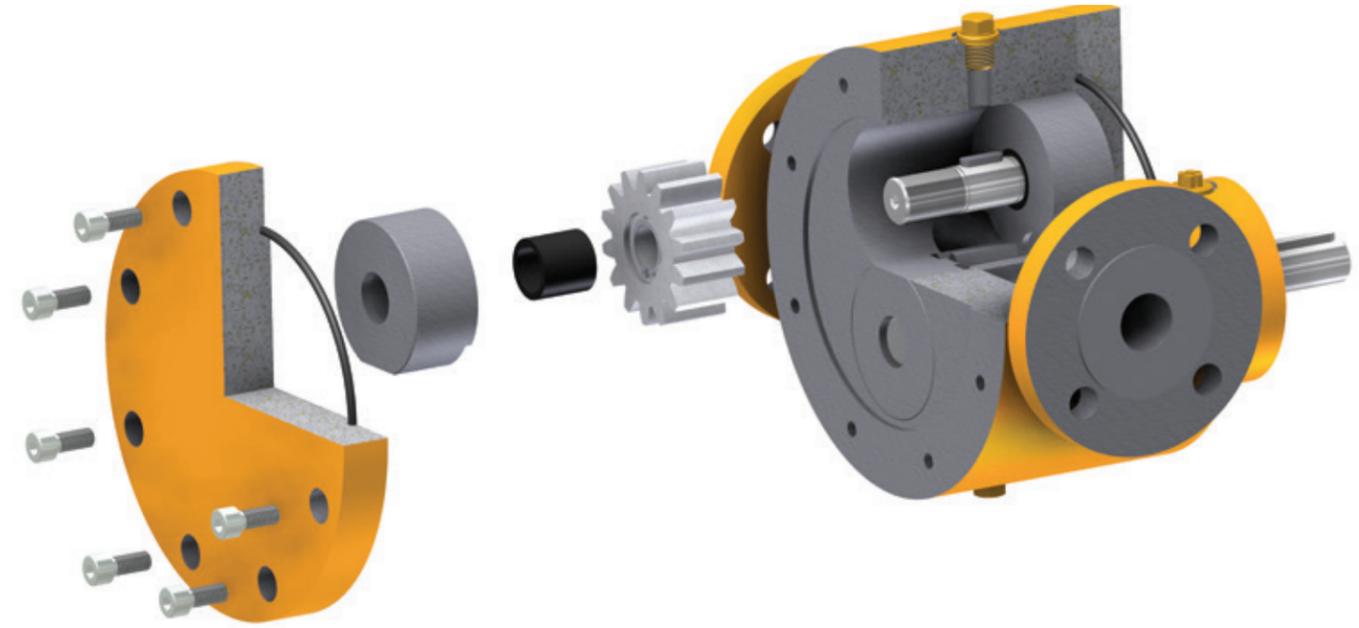

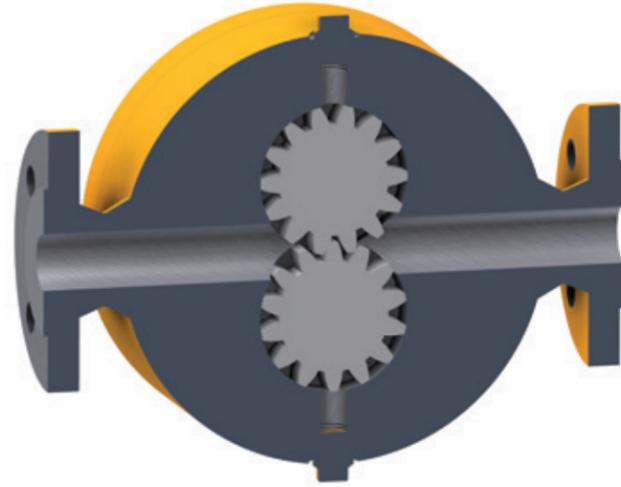

ZK BLUE SERIES

GEAR PUMP

FEATURES

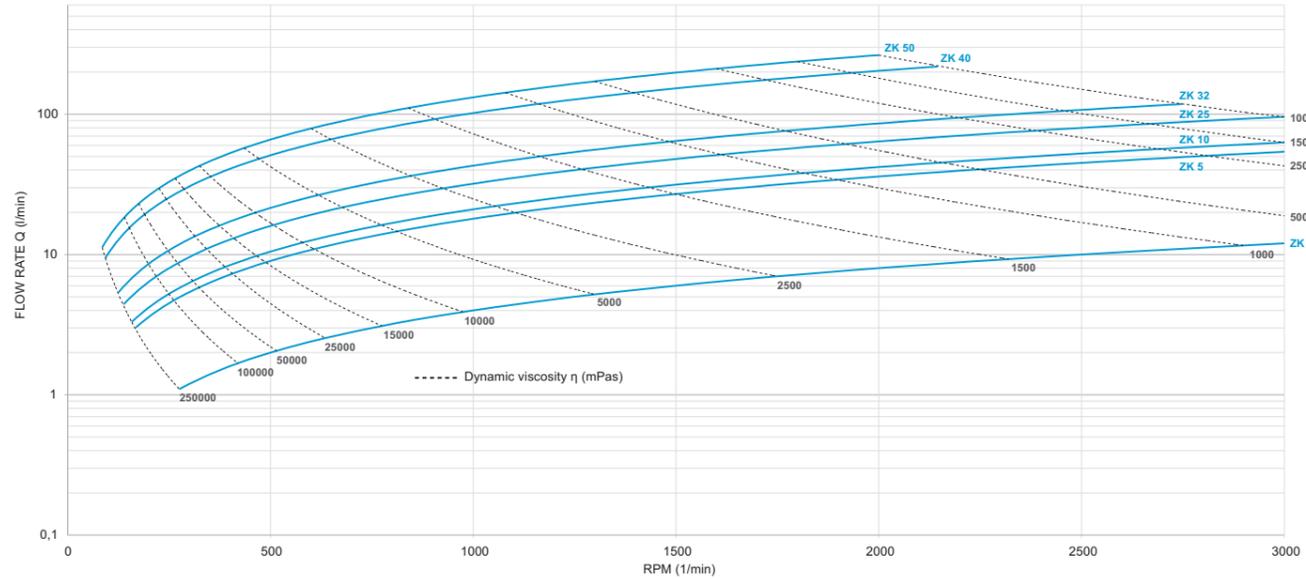

- **Pressure:** 120 bar
- **Suction lift:** 6 m
- **Flow rate:** 0.4 to 300 l/min (0.025 to 18 m³/h)
- **RPM:** 3,000 RPM
- **Efficiency:** 60 to 92%
- **Viscosity:** 0.5 to 25,000 mPas*
- **Temperature:** -60 to 450°C

*Higher values upon request

KS & KDS BLUE SERIES

ROTARY LOBE PUMP

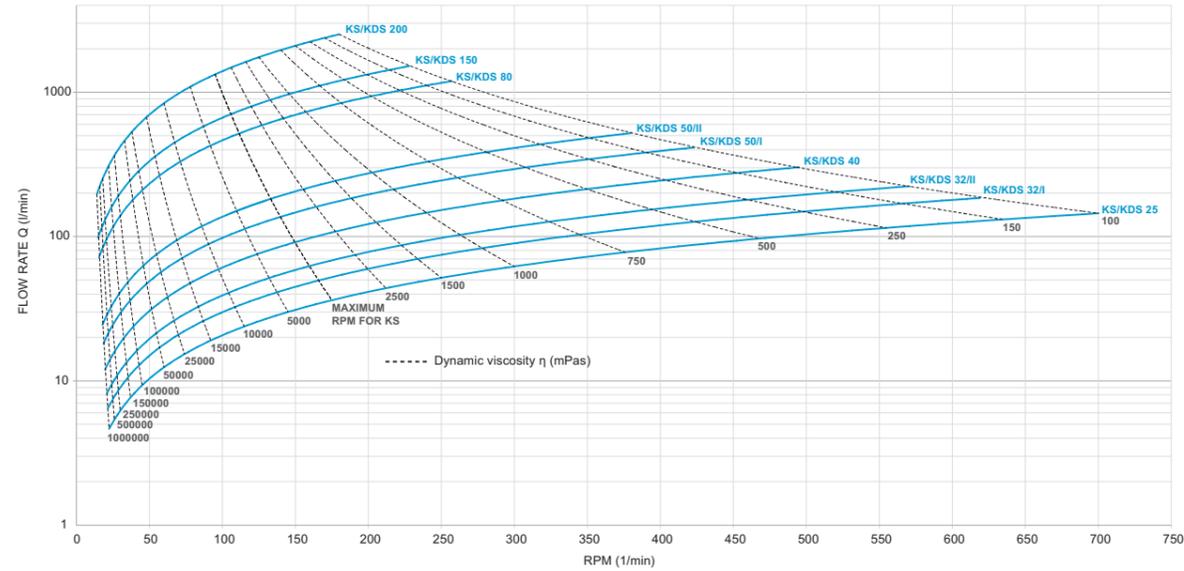

FEATURES

- **Pressure:** 70 bar
- **Suction lift:** 4 m
- **Flow rate:** 2 to 2,474 l/min (0.12 to 148 m³/h)
- **RPM:** 750 RPM
- **Efficiency:** 75 to 92%
- **Particle size:** max. 50 mm
- **Viscosity:** 10 to 3,400,000 mPas
- **Temperature:** -60 to 450°C

SEAL OPTIONS

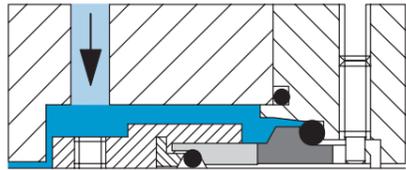

LIP SEAL

Max. pressure: 16 bar
 Rubber sealing rings available depending on temperature, pressure and RPM.

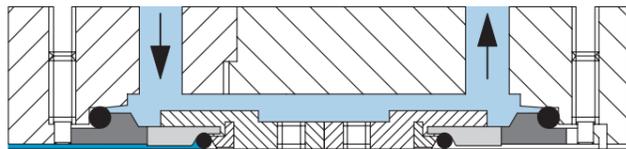

PACKING

Max. pressure: 120 bar
 Available with or without sealing/lubricating liquid connection.

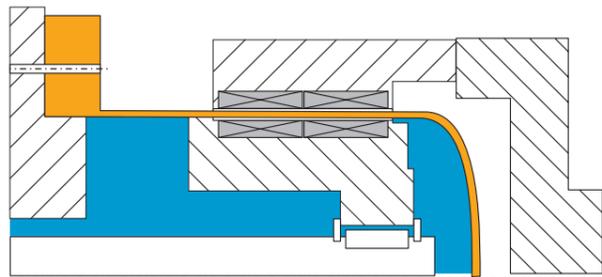

SINGLE MECHANICAL SEALS

Max. pressure: 120 bar
 Chosen specifically for customers pumping requirements. The pumps are designed to accept seals from all major manufacturers and can accommodate component or cartridge seals. All pumps are designed to accommodate API 682 mechanical seals and all API seal thermosyphon systems are available.

DOUBLE MECHANICAL SEALS

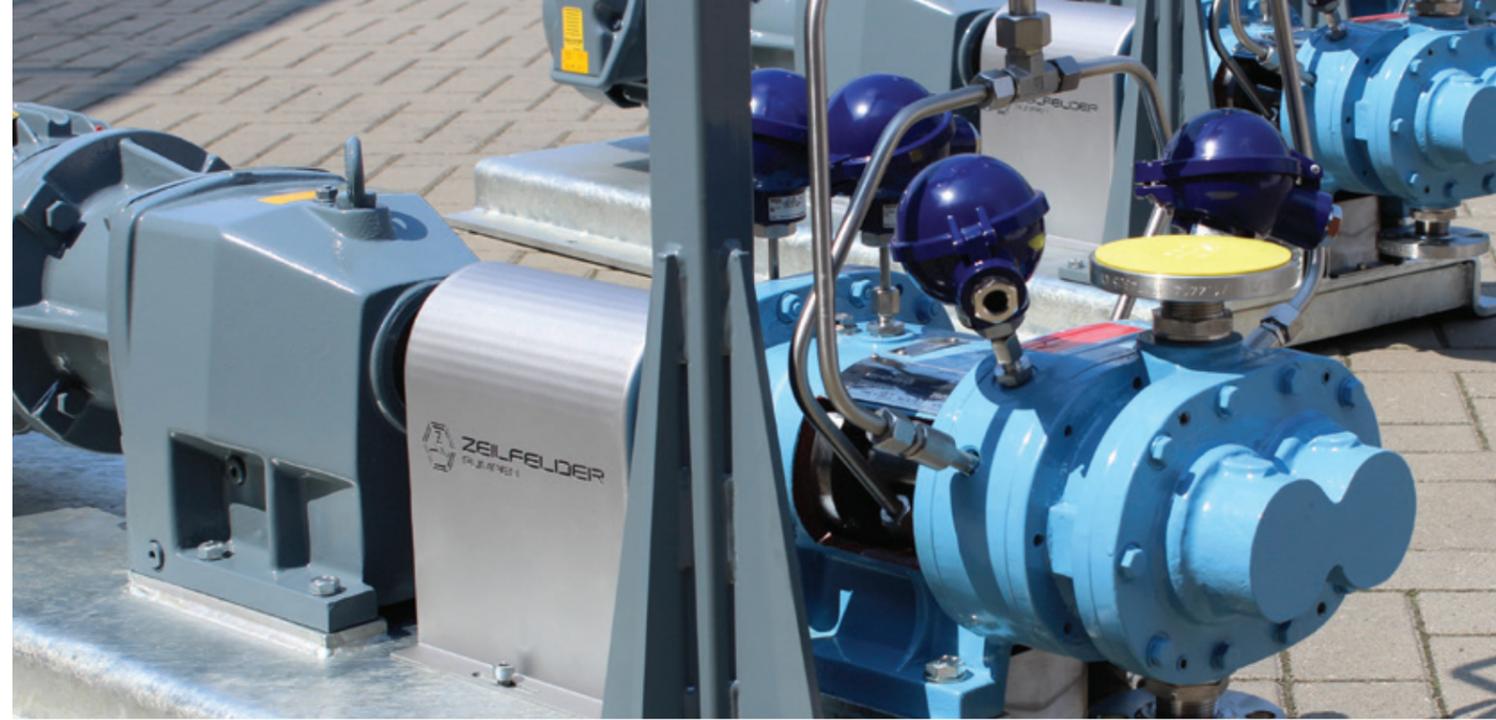

Max pressure: special seals up to 120 bar
 Note: Barrier fluid pressure must be at least 2 bar over pump pressure.
 All pumps are designed to accommodate API 682 mechanical seals and all API seal thermosyphon systems are available. Designed for explosive, toxic or specialty applications where no leakage is allowed.

MAGNETIC COUPLING

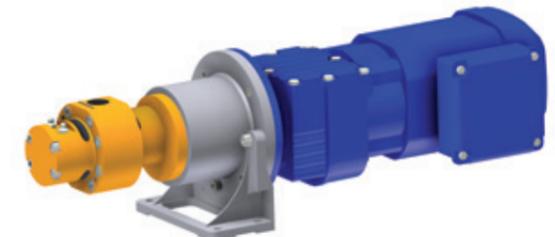

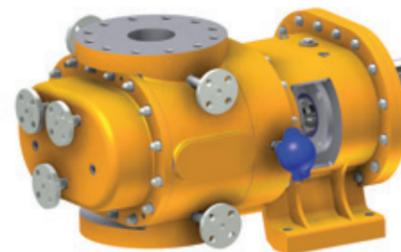

Max. pressure: 90 bar

- Available only for gear pumps
- Results in a hermetically sealed pump with no leakage
- Includes built-in motor overloading protection
- Available in API design
- Maintenance free, no wearing parts

CUSTOM SOLUTIONS FOR EXTREME APPLICATIONS

We provide custom solutions for extreme applications and pride ourselves on being able to produce pumps individually designed to solve your specific problem. Our team of engineers is ready to work with you on a design based on your requirements. We have seen almost every application in our 90+ years of business and are positive that we can provide you a custom-built solution.

INDUSTRIES

We produce gear pumps and rotary lobe pumps for almost every application; API pumps for the petrochemical industry, CIP pumps, hermetically sealed pumps, high pressure pumps for extreme applications, explosion proof pumps for dangerous applications and many more. Our pumps have proven their quality and efficiency for over 90 years in the following industries:

CHEMICAL

In addition to our conventional pump range, special and custom pumps are available built out of special materials with high performance coatings, heating and cooling jackets and special sensor requirements.

PETROCHEMICAL

We offer API self-priming rotary lobe and gear pumps with API 682 seals according to ATEX, TA-Luft, GOST-R and TR CU to deliver crude oil and all types of bitumen including those containing solids.

SHIPPING

We offer maritime-grade pumps for offshore applications to deliver heavy oil and machine lube oil. We also offer rotary lobe pumps to load and unload liquid chemicals, oil and bitumens with solids.

BUILDING

Our pumps deliver primary materials, protective agents, white cement, glue, silicone, waste water and filled bitumen for the building industry. For high temperature applications, or outside installations, heating jackets are available.

PHARMACEUTICAL

To respond to the requirements of the pharmaceutical industry we have designed pumps with reduced surface roughness down to 4µ, CIP (cleaning in place) design and aseptic connections.

FIBER

We offer pumps with high system pressure and high dosing precision (optional with heating jacket) to deliver synthetic fibers, finishing agents, paints with pigments and dyestuffs.

FOOD AND CANDY

Our stainless steel CIP rotary lobe pumps are in FDA compliant materials and are particular suitable for the meat and animal feed industry. We also offer special lobes to avoid caramelization on sugar based products as chocolate.

BITUMEN

We offer special low-speed rotary lobe pumps with heating jackets to deliver bitumen and filled bitumen under working temperatures up to 450°C. These low-wear pumps are long lasting due to low speed and high material hardness.

AUTOMOTIVE

Our pumps deliver solid emulsion and drilling liquids containing aluminium swarf and chips as well as wax, glue, paint containing solid color pigments and nanoparticles in accordance with the requirements of the automotive industry.

REGENERATIVE / ENERGY

Our heavy duty pumps are designed to deliver biomass, liquid manure and silage in biogas plants at high temperatures and with high solids loading. Our pumps are also used in nuclear plants to deliver highly concentrated acids.

ABRASIVE SOLIDS

Our rotary lobe pumps are specially designed to pump liquids with high concentration of solid particles or abrasive products as well as cooling lubricants with cuttings.

METALLURGY

Rotary lobe and gear pumps with heating jackets are used for furan resins, refractory finishings, mercury, gallium, zinc alloy and stibium alloys up to 450°C including various molten metals with fully ceramic pumps.
